

2008 Student Creativity Festival Participant Feedback:

Students are talking!

I learned that people can be smart and have fun at the same time.

I learned that you can make an instrument out of almost anything.

I learned that you can be creative by just being you.

I feel really happy that I came. I feel smarter!

I learned you can do a lot if you put your mind to it.

I learned that the simplest things could turn into something great.

I learned about different cultures.

I feel energized. I learned to express myself.

I learned it is good to talk and meet new people.

I learned a lot about creativity and science.

I learned that imagination is more important than knowledge.

I learned to try stuff before I judge stuff.

I suggest you keep doing the Creativity Festival!

Teachers are talking!

I loved the creativity of the students.

The day flew by and much was learned.

The students talked and shared about their experience all throughout lunch and during the museum time!

The festival was quite a valuable experience for the students.

Keep this wonderful program going!
